Harcros Pigments Inc.
Harcros Pigments Inc.
NPDES Permit No. IL0038709
Modification of NPDES Permit (After Public Notice)

December 3, 1990
Harcros Pigments, Inc.
2001 Lynch Avenue
E. St. Louis, Illinois 62205

Gentlemen:

The Illinois Environmental Protection Agency has reviewed the request for modification of the above-referenced NPDES Permit and issued a public notice based on that request. The final decision of the Agency is to modify the Permit as follows:

1. The permittee has been changed from Pfizer, Inc. to Harcross Pigments.
2. The sampling location for Outfall G01 has been specified as the point of discharge from the plant to the storm sewer.

Your request to remove ammonia monitoring requirements from the permit cannot be granted. The ammonia limits are water quality-based and as such cannot be adjusted to reflect influent concentrations or net changes in concentrations. A credit for influent or background concentrations may only be allowed for technology-based limits (see 35 Ill. Adm. Code 304.103 and 122.45(g)).

Enclosed is a copy of the modified Permit. You have the right to appeal this modification to the Illinois Pollution Control Board within a 30 day period following the modification date shown on the first page of the permit.

Should you have any question or comments regarding the above, please contact Ed Kane of my staff.

Very truly yours,

Thomas G. McSwiggin, P.E.
Manager, Permit Section
Division of Water Pollution Control
